

# MOTOR DETOX

detox your car

## ANTI-BACTERIAL AIR CONDITIONING - HEATING AND VENTILATION TREATMENT

### THE SOLUTION – MOTOR DETOX ANTI-BACTERIAL TREATMENT

- ...is recommended to all customers once a year for their air conditioning, heating and ventilation system.
- It is available in 4 fragrances, Apple, Lemon, Blueberry and Rush, please check with your department which are available.
- In addition there is a fragrance free option specifically designed for people who suffer from asthma and allergies who are unable to have perfumed or fragranced products.
- The fragrance will last no longer than a week but the treatment is guaranteed for 12 months.
- The treatment is for professional use only and is to be carried out on site.
- It is EN1276 approved

### HOW DO WE KNOW IT WILL WORK – BS EN1276:1997

- This means that our product has been independently tested in a laboratory to prove it works in killing off bacteria, and is not just an air freshener or deodoriser.

#### RECOMMEND

On an annual basis it is recommended that the Heating, Ventilation and Air Conditioning System is disinfected. We recommend that this is carried out today alongside your.....

Due to the way the system works, moisture builds up as a result of the changes in temperature, this creates the ideal breeding ground for bacteria to grow and multiply, these bacteria is then blown inside the cabin and will be inhaled.

The Anti-Bacterial Treatment is a simple but effective way of disinfecting the system, removing the mould and bacteria, eliminating the problem and leaving a pleasant fragrance. DETOXING THE SYSTEM.

**BS EN 1276:1997 – “Chemical disinfectants and antiseptics. Quantitative suspension test for the evaluation of bactericidal activity of chemical disinfectants and antiseptics used in food, industrial, domestic, and institutional areas.”**

Source: standardsdirect.org

**MOTOR DETOX** has been tested and proven to kill the following bacteria:

- Pseudomonas aeruginosa
- MRSA
- E-Coli (Escherichia coli)
- Listeria (monocytogenes)
- Salmonella (typhimurium)

# EMISSION CONTROL SERVICE

## WHAT DOES AN EMISSION CONTROL SERVICE DO?

The Motor Detox Emission Control Service is suitable for using with Petrol, Diesel and all Bio-Fuels.

It has been formulated using a blend of special detergents and additives that will help clean the entire fuel system, removing deposits from fuel injectors, intake valves and other fuel system components and will provide additional protection against fuel contamination.

## WHY CARRY OUT THE TREATMENT?

Helps clean and maintain the fuel system – safer more responsive drive

Helps lower emissions – environmental benefits

Helps improve the fuel consumption – providing cost saving

[www.motordetox.co.uk](http://www.motordetox.co.uk)

## ENGINE FLUSH & EMISSION CONTROL SERVICE

### WHY CARRY OUT A FUEL SYSTEM CLEANER?

- Advanced Fuel System Cleaner
  - Diesel Injector Cleaner
  - Petrol Injector Cleaner
- } All of the 3 fuel system cleaners have one main purpose:  
**TO CLEAN THE FUEL SYSTEM FROM START TO FINISH.**

It is a very simple and effective method. The principle of making the fuel system as clean and efficient as possible means the customer can benefit from:

- Improved fuel consumption.
- A reduction in harmful exhaust emissions.
- Improved fuel flow - meaning a more reliable and responsive engine giving better performance

### FUEL SYSTEM CLEANER – WHAT’S THE DIFFERENCE?

#### ADVANCED FUEL SYSTEM CLEANER

- Suitable for use with PETROL, DIESEL and all BIO-FUELS.
- Designed to clean the complete fuel system.
- As well as cleaning it will absorb any moisture within the fuel and tank, helping to alleviate any of the potential problems associated with contaminated fuels, which have become more prevalent since the introduction of Bio-Fuel blending.
- In Diesel Fuel – THE DIESEL BUG – this is bacterial contamination found in diesel fuel due to the presence of water/ moisture, causing sludge contamination throughout the fuel system.
- In Petrol – PHASE SEPARATION– this is the separation of unleaded fuel & the Bio-Ethanol content due to the presence of water.

#### DIESEL INJECTOR CLEANER

- This is specifically designed to be used in DIESEL engine cars to clean the complete fuel system.

#### PETROL INJECTOR CLEANER

- This is specifically designed to be used in PETROL engine cars to clean the complete fuel system

#### RECOMMEND

With Every service we recommend an Engine Flush & Emission Control Service. It is a two part cleaning process that cleans the Engine and entire Fuel System.

It is the ULTIMATE DETOX for your car. By cleaning the ENGINE it helps increase the effectiveness of the oil change and by cleaning the FUEL SYSTEM it will help improve efficiency, performance and lower emissions.

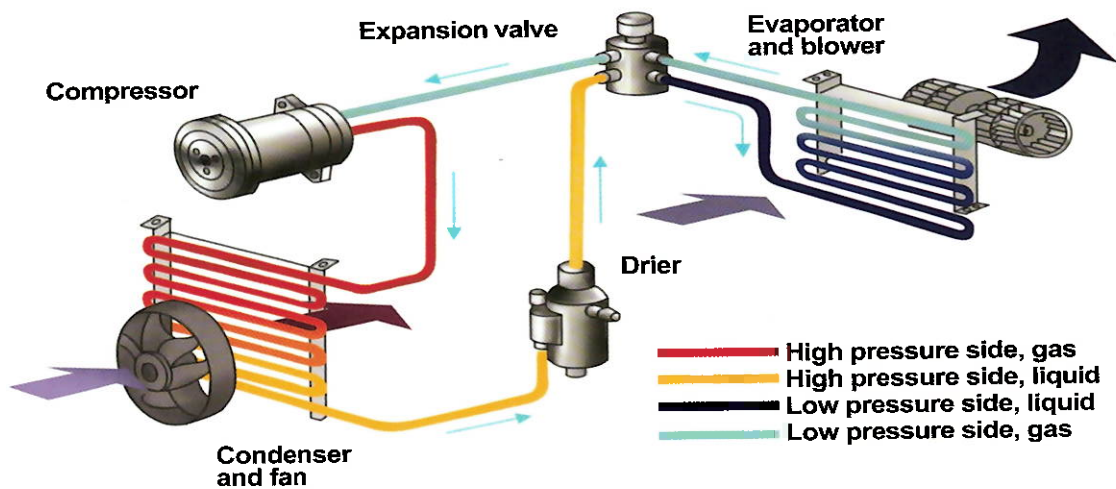

### RECOMMEND - BENEFITS TO THE CUSTOMER WILL BE:

- Environmental benefits and increased likelihood of passing Emissions test
- Cost Saving
- Safer more responsive drive

# AIR CONDITIONING TREATMENT

## HOW YOUR AIR CONDITIONING WORKS

### RUN YOUR AIR CONDITIONING ONCE A WEEK

- ✘ Unused air conditioning allows bacteria to breed
- ✘ Prolonged periods of inactivity can cause corrosion or seizure and seals to leak gas
- ✘ Replacement parts or a system re-gas can be very expensive

### LOOK AFTER YOUR CARS AIR CONDITIONING

- ✔ Switch air conditioning on at least once a week
- ✔ Disinfect annually, eliminate spores and reduce the risk of "sick car syndrome"
- ✔ Regular air conditioning checks and servicing
